Noise is very critical element in determining the quality of human health as it may cause the mental damage such as stress, disturbed sleep and difficulty in concentrating. Noise pollution created by vehicles, industrial processes, recreation and others have reached at alarming levels prompting the civic administration authorities to curb its extent especially in hospital areas, residential areas and other sensitive places. Noise barrier systems considered the most reasonable noise mitigation measure.

On the other hand, demand for calming environment by the residents has been increasingly growing on the back of recognition of well-being and thus the need for noise barrier system increasing day by day.

Based on regions, North America is anticipated to be a noteworthy region in terms of revenue generation in the global noise barrier system market. Growing highway projects and efforts minimize the noise pollution are expected to upsurge the demand of noise barrier system market in North America over the forecast period. Western Europe is projected to witness a relatively faster growth in the near future. In Asia Pacific, China and India are projected to grow at significant rates during the forecast period. Increasing investment by government in construction of new highways in this region are expected to escalate the demand of noise barrier system in Asia Pacific region.
