Description:

Snapshot

Peony is a flowering plant in the genus Paeonia, the only genus in the family Paeoniaceae. Peony varieties with huge, double flowers will be the focal point of the garden when they bloom in early summer. Single-flowered types are more subtle and combine well with other perennials. Flower colors include pink, red, white, and yellow, and the plants grow 18 inches to 3 feet tall, depending on the variety. Peonies make an attractive low hedge. However, they can take up to 3 years to mature, and don't perform well in hot summer climates.

The global Peony market will reach xxx Million USD in 2018 and with a CAGR of xx% between 2019-2025.
