Molybdenum trioxide is gray black powder. It is chemical compound derived from molybdenum, and used primarily in the steel industry for corrosion resistance, strengthening and heat resistance, molybdenum chemical industry.

The molybdenum trioxide industry concentration is high; there are few manufacturers in the world, and they are mainly distributed in America, Chile and China. This is mainly because the raw material is molybdenum ore which distribute in those areas. America, Chile and China have long history and unshakable status in this industry, like Molibdenos y Metales S.A., Freeport-McMoRan (FCX) and Jinduicheng Molybdenum Group, both have perfect products.

Many companies have several plants, usually close to aimed raw material areas so that it can decrease the transportation cost of the raw material cost. Some companies usually enter into China market by building joint ventures.

The import and export percent of this industry is high. Because this industry can be used in many fields and the regions which have no production of this product have to buy molybdenum trioxide from the regions which have huge production of molybdenum trioxide.

According to this study, over the next five years the Molybdenum Trioxide market will register a 2.1% CAGR in terms of revenue, the global market size will reach US$ 4070 million by 2024, from US$ 3670 million in 2019.
