Recycled plastics are the plastics that made from post-consumer or post-industrial plastics instead of the virgin resin. The process of recycling used plastic from consumable products is an efficient means to reprocess the material into useful products. Many different products make great sources of recyclable material, including: soda bottles, plastic packaging, sheets and pellets. Recycled plastic is used to make many different types of products. The type of product that is made out of recycled plastic depends on the type of plastic resin. There are several different types of plastic resin used to make different products, such as PET, PP, HDPE and LDPE.

Scope of the Report:

Recycled plastics can be used in various fields, like Packaging, Consumer Goods, Construction, Textile Fiber / Clothing, Landscaping / Street Furniture, etc. Textile fiber / clothing is the largest application of recycled plastics with market share of 30.81% in 2017, since nearly 80% of RPET is used to produce fiber. The market of recycled plastic is highly fragmented with a tail of manufacturers. As the largest production area of recycled plastics, there are more than 3000 companies supply recycled plastics. The market concentration in developed areas is higher comparatively. Leading suppliers in the worldwide are Clear Path Recycling, Clean Tech Incorporated, Mohawk Industries Incorporated, CarbonLite Industries, Envision Plastics Industries, Advanced Environmental Recycling Technologies Incorporated, Greentech and Veolia Polymers, which takes a combined share of less than 5% in 2017.
