FCC catalyst additives are injected into FCC units in small amounts for the purpose of improving specific yields, enhancing product quality, or for reducing emissions from the regenerator. The main composition of FCC catalyst additives is zeolite molecular sieve, which is the active ingredient in the function process on catalyst. And there are also other ingredients in different FCC catalyst additives, such as platinum metal, palladium metal, etc.

Scope of the Report:
FCC catalyst additives are used in process of vacuum gas oil, residual, and others. Report data showed that 71.67% of the FCC catalyst additives market demand in Vacuum Gas Oil production, 17.28% in residue production, and 11.05% in others in 2015. With the development of economy, these industries will need more FCC catalyst additives. So, FCC catalyst additives have a huge market potential in the future. Manufacturers engaged in the industry are trying to produce high quality FCC catalyst additives through improving manufacturing process. The major raw materials for FCC catalyst additives are sodium silicate, kaolin, sodium aluminate and others. Fluctuations in the price of the upstream product will impact on the production cost of FCC catalyst additives, and then impact the price of FCC catalyst additives. Additionally, the quality of raw materials would also impact the quality of FCC catalyst additives.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the sales price presents a downward trend according to the economy development status. Also, there will be fluctuation in gross margin.

The worldwide market for FCC Catalyst Additive is expected to grow at a CAGR of roughly 1.6% over the next five years, will reach 450 million US$ in 2024, from 410 million US$ in 2019, according to a new GIR (Global Info Research) study. This report focuses on the FCC Catalyst Additive in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa.
