Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) - Discontinued Products
Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) - Product Development Milestones
Featured News & Press Releases
Mar 25, 2019: BeyondSpring advancing patient targeting strategies for lead asset Plinabulin
Mar 21, 2019: Conatus announces top-line results from ENCORE-NF phase 2b clinical trial in NASH fibrosis
Mar 20, 2019: BeyondSpring to present clinical trial data on lead asset, Plinabulin, at 2019 St. Gallen International Breast Cancer Conference

Mar 13, 2019: Conatus Late-breaker oral presentation at EASL meeting to detail results of ENCORE-PH Phase 2b clinical trial in patients with NASH Cirrhosis and Severe Portal Hypertension

Mar 05, 2019: BeyondSpring presents new promising data in chemotherapy-induced neutropenia at 2019 ASCO-SITC Clinical Immuno-Oncology Symposium

Feb 28, 2019: New data shows addition of BeyondSpring’s Plinabulin reverses Neulasta’s potential immune-suppressive phenotype in treating chemotherapy-induced neutropenia

Feb 12, 2019: Conatus announces completion of enrollment in ENCORE-LF phase 2b clinical trial of Emricasan in patients with decompensated NASH cirrhosis

Jan 28, 2019: Conatus Pharmaceuticals announces publications expanding on previously reported results from completed phase 2 NAFLD-NASH, portal hypertension and liver cirrhosis clinical trials

Dec 27, 2018: BeyondSpring announces positive pre-NDA meeting with the U.S. FDA for its lead asset, Plinabulin

Dec 21, 2018: United States patent and trademark office issues composition of matter patent with beyondspring’s lead asset Plinabulin with protection to 2036

Dec 06, 2018: BeyondSpring announces phase 3 study 105 of its lead asset Plinabulin for chemotherapy-induced neutropenia meets primary endpoint at interim analysis

Dec 05, 2018: Conatus Announces Results from ENCORE-PH Phase 2b Clinical Trial in NASH Cirrhosis

Dec 04, 2018: Data for BeyondSpring’s lead asset, Plinabulin, for chemotherapy-induced Neutropenia (CIN) prevention shows differentiated profile compared with G-CSF and adds additional protection to G-CSF

Nov 15, 2018: Study of plinabulin, and nivolumab + ipilimumab in SCLC now open

Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) - Pipeline Review, H1 2019

Summary

According to the recently published report ‘Caspase 8 - Pipeline Review, H1 2019’; Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) pipeline Target constitutes close to 5 molecules. Out of which approximately 3 molecules are developed by companies and remaining by the universities/institutes.

Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) - Caspase-8 is a caspase protein, encoded by the CASP8 gene. It binds to the adapter molecule FADD recruits it to either receptor. The resulting aggregate called death-inducing signaling complex (DISC) performs CASP8 proteolytic activation. The active dimeric enzyme is then liberated from the DISC and activates downstream apoptotic proteases. Proteolytic fragments of the N-terminal propeptide (termed CAP3, CAP5 and CAP6) are likely retained in the DISC. Cleaves and activates CASP3, CASP4, CASP6, CASP7, CASP9 and CASP10. It participates in the GZMB apoptotic pathways. It cleaves ADPRT. Hydrolyzes the small-molecule substrate, Ac-Asp-Glu-Val-Asp-|-AMC.

The report ‘Caspase 8 - Pipeline Review, H1 2019’ outlays comprehensive information on the Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type; that are being developed by Companies / Universities.
It also reviews key players involved in Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) targeted therapeutics development with respective active and dormant or discontinued projects. Currently, The molecules developed by companies in Phase III, Phase II and Preclinical stages are 1, 1 and 1 respectively. Similarly, the universities portfolio in Preclinical and Discovery stages comprises 1 and 1 molecules, respectively.

Report covers products from therapy areas Oncology, Cardiovascular, Gastrointestinal, Genito Urinary System And Sex Hormones, Hematological Disorders, Immunology, Infectious Disease and Toxicology which include indications Autoimmune Hepatitis, Bladder Cancer, Chemotherapy Induced Neutropenia, Colorectal Cancer, Febrile Neutropenia, Glioblastoma Multiforme (GBM), Hepatitis C, Hepatocellular Carcinoma, Liver Cirrhosis, Liver Failure (Hepatic Insufficiency), Liver Fibrosis, Liver Transplant Rejection, Melanoma, Metastatic Brain Tumor, Metastatic Breast Cancer, Metastatic Hormone Refractory (Castration Resistant, Androgen-Independent) Prostate Cancer, Multiple Myeloma (Kahler Disease), Non Alcoholic Fatty Liver Disease (NAFLD), Non-Alcoholic Steatohepatitis (NASH), Non-Small Cell Lung Cancer, Portal Hypertension, Renal Failure and Small-Cell Lung Cancer.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

Scope
- The report provides a snapshot of the global therapeutic landscape for Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61)
- The report reviews Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources
- The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages
- The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities
- The report reviews key players involved in Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) targeted therapeutics and enlists all their major and minor projects
- The report assesses Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type
- The report summarizes all the dormant and discontinued pipeline projects
- The report reviews latest news and deals related to Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD
Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) targeted therapeutics

Reasons to buy
- Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies
- Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage
- Identify and understand the targeted therapy areas and indications for Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61)
- Identify the use of drugs for target identification and drug repurposing
- Identify potential new clients or partners in the target demographic
- Develop strategic initiatives by understanding the focus areas of leading companies
- Plan mergers and acquisitions effectively by identifying key players and it’s most promising pipeline therapeutics
- Devise corrective measures for pipeline projects by understanding Caspase 8 (Apoptotic Cysteine Protease or Apoptotic Protease Mch 5 or CAP4 or FADD Homologous ICE/Ced-3 Like Protease or FADD Like ICE or ICE Like Apoptotic Protease 5 or MORT1 Associated Ced 3 Homolog or CASP8 or EC 3.4.22.61) development landscape
- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
