**Description:**

Fighter aircraft are the most advanced aerial platform within the sphere of military hardware because of its design, speed, and weaponry. These aircraft enable airborne dominance and neutralization of enemy fighter planes, and they intercept/target enemy bombers. The global fighter aircraft market is dominated by manufacturers in the US, China, and Russia. However, since the past decade, there have been increasing developments from countries such as France, Israel, and India as well.

In terms of geography, EMEA accounted for the maximum market share and will continue to dominate the market for the next few years. One of the major factors that drive the market’s growth in the region is the growing influx of illegal immigration from countries such as Syria and Lebanon into European countries that escalates the risk of internal insurgency and extremist attacks.

The Fighter Aircraft market was valued at xx Million US$ in 2018 and is projected to reach xx Million US$ by 2025, at a CAGR of xx% during the forecast period. In this study, 2018 has been considered as the base year and 2019 to 2025 as the forecast period to estimate the market size for Fighter Aircraft.
