Coenzyme Q10, also known as ubiquinone, ubidecarenone, coenzyme Q, and abbreviated at times to CoQ10, is a naturally-occurring compound located in every cell in the body. Coenzyme Q10, or merely CoQ10, plays a key role in producing energy in the mitochondria, the part of a cell responsible for the production of energy in the form of ATP. Coenzyme Q10, in some cases referred to merely as CoQ10, is synthesized inside our bodies, it is also known to be found in meats, particularly in the heart, such as pork, chicken and beef, and many oils.

Coenzyme Q10 is sold in the United States and abroad as an over-the-counter dietary supplement and is widely recognized as completely safe with no reported toxicity in over a thousand published human and animal trials.

As Chinese overall economic downward trend in the past few years, and international conomic situation is complicated, in the next few years there will be many uncertainties, and coupled with Coenzyme Q10 industry in short supply on the market in the past few years, more and more companies enter into Coenzyme Q10 industry, the current demand for Coenzyme Q10 product is relatively high, but lightly supply exceeds demand. Ordinary Coenzyme Q10 products on the China market do not sell well; Coenzyme Q10’s price is lower than past years.

In 2019, the market size of Coenzyme Q10 is 370 million US$ and it will reach 540 million US$ in 2025, growing at a CAGR of 5.1% from 2019; while in China, the market size is valued at xx million US$ and will increase to xx million US$ in 2025, with a CAGR of xx% during forecast period.
