Description:

Military Drones, also known as remotely piloted or unmanned aircraft range in size from simple, hand-operated systems to long endurance, high-altitude systems similar in operation to manned aircraft. Military Drones loiter over a specific area for hours to provide commanders with persistent surveillance of enemy positions and allow ground-based troops to observe beyond hills that identify enemy positions intelligently. Drones have assumed a leading role in counterinsurgency and counterterrorism.

The global Military Drone/Unmanned Aerial Vehicle market was valued at 5000 million US$ in 2018 and will reach 12400 million US$ by the end of 2025, growing at a CAGR of 12.0% during 2019-2025.
