Organic chocolate is chocolate made from organic raw materials such as organic cocoa, sugar, milk, and others. During 2017, the organic dark chocolate segment accounted for the largest share of the market. Organic dark chocolate is loaded with nutrients that are associated with good health as it contains a higher quantity of cocoa compared to other varieties of organic chocolate. The consumption of organic dark chocolate improves blood flow, lowers blood pressure, and improves brain function. Additionally, organic dark chocolate also contains flavonoids, which are compounds that play the role of antioxidants and help in lowering blood pressure and reducing bad cholesterol or low-density lipoprotein (LDL) cholesterol. The growing preference for dark chocolates will positively influence the organic chocolate market share and organic chocolate market growth.

This organic chocolate market research study estimates that in terms of geographic regions, EMEA will be the major revenue contributor to the market by 2023. The increasing consumption of chocolate as snacks, the growing demand for healthy organic snacks among consumers, and the rising interest in the production of organic chocolate, will fuel the growth of the organic chocolate market in this region. Additionally, growing concern about the presence of artificial ingredients in chocolates has led consumers to opt for organic chocolates. This will further propel the market’s growth prospects in this region.
