The global enhanced oil recovery (EOR) market is currently witnessing robust growth. Enhanced oil recovery (EOR), also known as tertiary recovery, refers to the process through which otherwise immobile residual oil is mobilized either physically, chemically or thermally. As primary and secondary oil recovery methods can leave up to 75% of the oil in the reservoir, oil extracting companies have started relying on EOR or tertiary oil recovery methods. Enhanced Oil Recovery market industry is poised to raise USD 94.6 billion by 2026. Enhanced Oil Recovery market is valued USD 55.9 billion in 2018 is anticipated to grow USD 94.6 billion with the compounded annual growth of 6.80% over the forecast period 2019-2026.

Over the past few years, the rapid depletion of fossil fuels has contributed to the increasing application of EOR technologies in the oil and gas industry. The rising demand for oil has further added to the growing demand for EOR worldwide. In addition, several governments around the world are taking initiatives for utilizing advanced technologies for oil extraction to achieve higher profits from existing oil and gas fields. For example, countries like China and India are offering financial incentives to attract multinational companies to invest in the enhanced oil recovery market.
